

**FROM THE
EDITOR**

WE ARE MAKING PROGRESS

grows stronger each year.

Dear Esteemed Readers,
Welcome to this edition of the NISEB Bulletin! It is heartwarming to witness the steady progress of our society. Our annual conferences continue without fail, our membership base is expanding, our webinar takers a new turn, and our annual quiz competition

In this issue, we celebrate the remarkable achievements of our members, including their well-deserved elevations and appointments in various institutions. A special highlight is the recognition of one of our founding fathers, Professor Musbau Akanji, who has been honored with the prestigious title of Emeritus Professor.

Indeed, we are making progress, and together, we will achieve even greater heights.

Enjoy the read!

Dr. David Olugbenga Adetitun
Editor, NISEB Bulletin

FROM THE EDITOR

but we pulled through by sheer determination and resilience. I salute your courage as experimental biologists. I am also happy that the bulletin has been produced again after a short break.

In the previous year, we had webinars and most importantly our annual national conference. The conference at the Federal University of Technology, Akure was highly attended by diverse groups of experimental biologist. It was a celebration of the diversity that our society represents. Two distinguished members were inducted into the Fellowship of the Society. Our Chief host (Prof. Adenike T. Oladiji), a distinguished member of the society and current Vice-Chancellor of FUTA, treated us to a memorable conference. We express our

deepest appreciation to her and the LOC Chairman.

The year 2025 has started for us as a society on the fast lane; we already had a well-attended webinar courtesy of our Babcock University Branch and presented by Prof. Omotuyi. It was titled The experimental biology of virucidine against the COVID-19 pandemic: approaches in the discovery of antiviral agents from nature. The first and second announcement of our 2025 have been released. The conference has been fixed for 8th – 11th April, 2025. It must be noted that the conference is coming up quite early this year.

It is also the year when the tenure of the current executives will finish. Particularly an election to fill our position needs to be conducted and we encourage all of you to be active participants. Pay your annual dues and be a good ambassador of the society. Please enjoy the rest of the contents of the bulletin.

Prof. Bamidele Victor Owoyele, FNISEB.
President

Who is this Emeritus **Professor** Musbau Akanji?

Professor Musbau Adewumi Akanji was born in Offa, Kwara State, Nigeria. He is a distinguished biochemist and academic giant.

He began his education at Offa Grammar

School (1965–1969) and completed his A-Levels at Olivet Baptist High School, Oyo (1970–1971). He earned his B.Sc. in Biochemistry from the University of Ibadan (1972–1975) and later obtained his M.Sc. and Ph.D. in Biochemistry from the University of Ife (now Obafemi Awolowo University) between 1979 and 1986.

Professor Akanji's academic career commenced as a Research Biochemist at the Nigerian Institute of Trypanosomiasis Research in Vom, Plateau State. In 1986, he joined the University of Ilorin as a Lecturer I in the Department of Biochemistry, ascending to the rank of Professor by 1993. During his years in service,

he held various administrative roles and contributed significantly to numerous university committees.

In 2005, he became the pioneer Vice-Chancellor of Al-Hikmah University in Ilorin, Kwara State. Later, he served as the Vice-Chancellor of the Federal University of Technology, Minna (FUT Minna).

During his tenure at FUT Minna, he oversaw the development of world-class student hostels through the Presidential NEEDS Assessment Fund, enhancing the university's infrastructure. Professor Akanji's research interests encompass biochemical toxicology, phytomedicine, diabetes, free radicals, and reactive oxygen species. He has supervised numerous postgraduate theses, with several of his mentees achieving professorial positions in various universities.

In recognition of his contributions to academia, the University of Ilorin recently appointed him as an emeritus professor. Additionally, Professor Akanji is a founding member of the Nigerian Society for Experimental Biology (NISEB). He is also a fellow of the Nigerian Academy of Science (NAS), reflecting his commitment to advancing scientific research in Nigeria.

NISEB WEBINAR TAKES A NEW TURN

For years, the NISEB webinar series has been a cornerstone of intellectual engagement and knowledge sharing among members. Traditionally, a dedicated webinar committee, formed from the executive members, managed and organized these quarterly sessions, ensuring high-quality discussions on cutting-edge scientific topics.

However, in a bold move to foster leadership, enhance participation, and strengthen the society's institutional and state chapters, NISEB has restructured its approach to hosting webinars. Going forward, the responsibility of organizing and hosting the webinars will be transferred to individual NISEB chapters. Instead of a quarterly schedule, these webinars will now be held monthly, offering more frequent opportunities for learning and collaboration. Each hosting chapter will take charge of inviting

distinguished guests, curating relevant topics, and running the program with full support from the NISEB National Executive Council (NEC). This strategic shift not only decentralizes the process but also provides a platform for chapters to showcase their organizational capabilities, network with experts, and elevate their influence within the scientific community.

With this new direction, NISEB aims to drive a more dynamic and inclusive webinar experience, ensuring that members across various regions actively contribute to and benefit from the wealth of knowledge that the society offers. Indeed, the NISEB webinar series has taken a new turn—one that promises greater engagement, development, and impact.

HIGHLIGHTS FROM NISEB 2024 CONFERENCE AT FUTA, NIGERIA

The NISEB 2024 annual conference and general meeting was held at Federal University of technology Akure (FUTA). The conference was a nice event that showcased research outputs from various laboratories. Below are some of the people who made the event happen.

**Courtesy visit by some
NISEB leaders to the
VC of FUTA before the
opening ceremony**

**A presenter VC of
FUTA with the BOT
Chairman NISEB VP
with NISEB BOT
Secretary**

**Some participants

NISEB 2024 CONFERENCE AT FUTA, NIGERIA

PROFILE

OF **PROF FAFIOYE,** **NISEB BOT Ag. CHAIRMAN**

Professor Oyebamiji Oladeni Fafioye, a distinguished academic in the Department of Zoology and Environmental Biology at Olabisi Onabanjo University (OOU), has been appointed as the new Chairman of the Board of Trustees (BOT) for the Society for Experimental Biology of Nigerian (NISEB), succeeding Professor H. O. B. Oloyede.

Throughout his tenure at OOU, Professor Fafioye has demonstrated exceptional leadership qualities that have significantly contributed to the advancement of both the university and the broader scientific community. His leadership style is characterized by a commitment to academic excellence, mentorship, and collaborative research.

As a mentor, Professor Fafioye has supervised over 110 undergraduate projects, 45 master's degree dissertations, and many Ph.D. theses, reflecting his dedication to nurturing the next generation of scientists.

In his new role as NISEB BOT Chairman, Professor Fafioye is expected to leverage his extensive experience and leadership skills to further the society's mission of promoting experimental biology in Nigeria. His appointment is anticipated to bring renewed vigor and direction to NISEB's initiatives, fostering growth and innovation within the society and beyond.

NISEB PRESIDENT ELECTED CHAIRMAN OF IBRO-ARC

The President of NISEB, who is also the Dean of Postgraduate School at the University of Ilorin has been elected as the chairman of African Regional Committee (ARC) of the International Brain Research Organization (IBRO).

NISEB PRO BECOMES BIOCHEMISTRY HOD IN ILORIN

The Public Relations Officer of NISEB. Professor Faoziyat Adenike Sulaiman is the new Head of the Department of Biochemistry, Faculty of Life sciences, University of Ilorin. The erudite professor was the former secretary of NISEB.

PROFESSOR ARISE BECOMES DEAN OF LIFE SCIENCES

A NISEB member, Professor Rotimi Arise became the Dean of Life Sciences at the University of Ilorin. His Deanship is with effect from August 1, 2024. Prof Arise was elected as Dean unopposed. NISEB bulletin wish him a successful tenure.

AJIBOSO SEMIU OLALEKAN BECOME PROFESSOR AT NASSARAWA

A pioneer member of NISEB, Professor Ajiboso Semiu Olalekan got his full chair recently.

The erudite don lectures and does research at Nassarawa State University. Congratulations!

DR ADETITUN GETS PROMOTED TO READER!

The General Secretary of NISEB, Dr David Olugbenga Adetun is now a Reader/Associate Prof, The diligent environmental microbiologist was the former assistant national secretary of NISEB.

DR BENJAMIN CHRISTOPHER ESSIEN BECOME SENIOR LECTURER & HOD

A member of NISEB, Dr Benjamin Christopher Essien got a double! He was promoted to the rank of Senior lecturer and also appointed as Ag. HOD, Department of Biology, Nigerian Army University, Biu, Borno State. Congratulations!

PROF RISIKAT NIKE AHMED GETS HER FULL CHAIR

The chapter coordinator of NISEB, Unilorin, Professor R. N. Ahmed got promoted to the enviable position of professor at the university of Ilorin recently. She was the former HOD, Microbiology and also former Deputy Director of the Technical and Entrepreneurship Centre (TEC) at Unilorin.

NISEB EDITOR-IN-CHIEF ELECTED DEPUTY VICE CHANCELLOR

The Editor in Chief of NISEB Journal, Prof. C. C. Osubor has been elected Deputy Vice Chancellor Administration, University of Benin, Nigeria. Congratulations sir.

HUSBAND OF NISEB VICE PRESIDENT APPOINTED VICE CHANCELLOR

The Vice President of NISEB, Prof. E. S. Omoregie's husband has been appointed Vice Chancellor of the University of Benin, Nigeria. He resumed duty in December, 2024. Congratulations sir.

The Role of Artificial Intelligence in Scientific Research: A Product of Research and a Tool for Progress

Introduction Artificial Intelligence (AI) has become a transformative force in modern society, impacting various sectors, including healthcare, finance, education, and scientific research. But what exactly is AI? AI refers to the development of computer systems capable of performing tasks that typically require human intelligence, such as problem-solving, decision-making, and data analysis. The emergence of AI has sparked discussions about its origins and its role in scientific inquiry. Is AI a product of research? Should AI be employed in scientific research? This article explores these questions and highlights AI's growing significance in the scientific world.

AI as a Product of Research AI is undeniably a product of extensive research spanning several decades. The field of AI originated from mathematical and computational theories, cognitive science, and neuroscience. Pioneers such as Alan Turing, John McCarthy, and Marvin Minsky laid the foundations for AI research. The development of machine learning algorithms, deep learning, and neural networks has been driven by rigorous experimentation and technological advancements. Today, AI continues to evolve through ongoing research in computer science, data science, and related disciplines, proving that it is a product of both theoretical and applied scientific exploration.

The Use of AI in Scientific Research The integration of AI into scientific research has revolutionized various fields. AI algorithms can analyze vast datasets at unprecedented speeds, identify patterns, and generate insights that would take human researchers years to uncover. Here are some key areas where AI is making a significant impact:

1. **Biomedical Research and Drug Discovery:** AI accelerates drug discovery by predicting molecular interactions, identifying potential drug candidates, and reducing the time required for clinical trials. AI-driven models have been instrumental in COVID-19 vaccine development and cancer research.
2. **Climate Science and Environmental Studies:** AI is used to model climate change,

predict weather patterns, and optimize renewable energy solutions. Machine learning helps analyze satellite imagery to monitor deforestation, ocean pollution, and biodiversity loss.

3. **Physics and Space Exploration:** AI enhances the analysis of astronomical data, assists in discovering new exoplanets, and helps operate space probes and rovers on distant planets.
4. **Genomics and Personalized Medicine:** AI enables genetic research by decoding DNA sequences, identifying disease markers, and tailoring personalized treatments based on an individual's genetic makeup.
5. **Material Science and Engineering:** AI aids in discovering new materials with desired properties, improving manufacturing processes, and optimizing structural designs.

Ethical Considerations and Challenges While AI offers tremendous benefits, its use in scientific research raises ethical concerns. Issues such as data privacy, bias in AI algorithms, and the potential for automation replacing human researchers must be addressed. Ensuring transparency, accountability, and fairness in AI-driven research is crucial for maintaining scientific integrity.

AI is both a product of research and a powerful tool for advancing scientific discovery. Its ability to process vast amounts of data, identify patterns, and generate new hypotheses makes it an indispensable asset in research fields ranging from medicine to space exploration. However, responsible use, ethical considerations, and continuous oversight are necessary to maximize AI's potential while mitigating risks. As AI continues to evolve, its role in shaping the future of scientific inquiry will only grow stronger, making it an essential component of modern research.

UPDATE ON NISEB NATIONAL QUIZ COMPETITION

We are pleased to report on the progress made so far with the 2nd edition of the prestigious NISEB Quiz Competition. The competition, which aims to promote excellence in experimental biology education among undergraduate students, has witnessed a significant increase in participation and enthusiasm.

A total of 14 schools from across the country enrolled for the first round of the competition, which commenced on Monday, 27th January 2025, as per the attached schedule. We appreciate the overwhelming response and optimism of the contestants and look forward to a keenly contested competition.

2025 NISEB QUIZ COMPETITION

PROPOSED SCHEDULE

S/N	Name of Institution	Email address	Proposed Date	Time
1	Nigerian Army University Biu (NAUB)	benjaminessien8@gmail.com	Monday, 27-Jan	11:00 am
	Nigerian Army University Biu (NAUB)	hakeemverified@icloud.com		
2	Bayelsa medical university	henryalpha04@gmail.com	Monday, 27-Jan	11:30 am
	Bayelsa medical university	henryalpha04@gmail.com		
	Bayelsa medical university	henryalpha04@gmail.com		
	Bayelsa Medical University	destinyenize24@gmail.com		
3	Covenant University	banke.ogunlana@covenantuniversity.edu.ng	Monday, 27-Jan	12:00 pm
4	Babcock University Ilishan-Remo Ogun State	kayodeab@babcock.edu.ng	Monday, 27-Jan	12:30 pm
5	Adekunle Ajasin University, Akungba Akoko Ondo State	olawole.adeniran@aaua.edu.ng or olyni2001@yahoo.co.uk	Monday, 27-Jan	1:00 pm
6	University of Ilorin	adetitun.do@unilorin.edu.ng	Monday, 27-Jan	1:30 pm
	University of Ilorin	adetitun.do@unilorin.edu.ng		
7	Southwestern university	Ese4betterlife@gmail.com	Friday, 31-Jan	11:00 am
	Southwestern university	ese4betterlife@gmail.com		
	Southwestern university	ese4betterlife@gmail.com		
8	Delta State University of Science and Technology Ozoro	isojeef@dsust.edu.ng	Friday, 31-Jan	11:30 am
9	Bells University of Technology Ota	ofonifade@bellsuniversity.edu.ng	Friday, 31-Jan	12:00 pm
10	Olusegun Agagu University of Science and Technology, Okitipupa	es.akintimehin@oauastech.edu.ng	Friday, 31-Jan	12:30 pm
11	Lagos State University	Omolade.okwa@lasu.edu.ng	Friday, 31-Jan	1:00 pm
12	Mountain Top University	jeremiahgbemisolaoluwa@mtu.edu.ng	Friday, 31-Jan	1:30 pm
13	Taraba State University, Jalingo, North East	elgbanc1@gmail.com	Friday, 31-Jan	2:00 pm
14	The Federal University of Technology, Akure	acakinmoladun@futa.edu.ng	Friday, 31-Jan	2:30 pm

The quiz is for 20 minutes per institution, then a 10-minute interval before the next institution.

**The quiz sessions are set for 11 – 2 pm on Monday and Friday.

We are delighted to acknowledge Covenant University as one of our sponsors. We also express gratitude for the generous support of Prof. Bako, Vice-Chancellor of Taraba State University. Their contributions have been invaluable in supporting the organization of the competition. We await responses from other contacted sponsors and look forward to their support.

The second round of the competition is scheduled for the second week of February, featuring schools that qualify based on their first-round results. We will provide updates on the progress and look forward to sharing the excitement of the final physical round during the 24th NISEB conference at Delta State University, Ozoro, in April 2025.

Thank you for your continued support.

Best regards,

Dr. Omowumi Kayode
National Coordinator

Where to Look for Grant and Research Opportunities as a Nigerian Experimental Biologist

Securing funding for research is a crucial step in advancing scientific discovery and career development. As an experimental biologist in Nigeria, finding the right grants and research opportunities can be challenging, but with the right strategies and resources, it is achievable.

Here are some key places to explore:

1. Government and Local Funding Agencies

- **Tertiary Education Trust Fund (TETFund):** Provides research grants for academic staff in Nigerian universities.
- **National Research Fund (NRF):** Supports research in various scientific fields, including experimental biology.
- **Raw Materials Research and Development Council (RMRDC):** Funds research focusing on local raw materials and their applications.
- **National Biotechnology Development Agency (NABDA):** Supports research in biotechnology and related fields.

2. International Grant Opportunities

- **The Wellcome Trust:** Offers funding for biomedical and health-related research.
- **Bill & Melinda Gates Foundation:** Supports research in agriculture, health, and biosciences.
- **National Geographic Society Grants:** Funds scientific research, including biodiversity and conservation.
- **Alexander von Humboldt Foundation:** Provides fellowships for postdoctoral research in Germany.
- **International Foundation for Science (IFS):** Supports early-career researchers in developing countries.
- **The World Academy of Sciences (TWAS):** Offers research grants and travel fellowships for scientists in developing nations.

3. University-Based Research Grants

Many Nigerian universities provide internal research grants to faculty members. Check with your institution's research office or postgraduate school for available funding.

environmental and biological sciences.

- **Nestlé Foundation for Research in Developing Countries:** Provides funding for research related to nutrition and health.

5. Scientific Societies and Organizations

- **Society for Experimental Biology of Nigeria (NISEB):** May provide funding or networking opportunities for members.
- **African Academy of Sciences (AAS):** Offers research grants and capacity-building programs.
- **Organization for Women in Science for the Developing World (OWSD):** Supports female researchers with grants and fellowships.

6. Online Databases and Grant Search Engines

- **Grants.gov:** A global database for

research funding opportunities.

- **ResearchGate and Academia.edu:** Networking sites where researchers share funding information.
- **Science for Africa Foundation:** Supports African researchers with grant opportunities.

Securing research funding requires persistence and a strategic approach. By exploring these sources, building strong research proposals, and collaborating with other scientists, Nigerian experimental biologists can access valuable grants to advance their research and contribute to scientific progress. Keep an eye on deadlines, stay connected with research networks, and take advantage of available opportunities!

SOCIETY FOR EXPERIMENTAL BIOLOGY OF NIGERIA

APPLICATION FOR FELLOW OF THE SOCIETY FOR EXPERIMENTAL BIOLOGY OF NIGERIA, 2025

National Secretariat: University of Ilorin, P.M.B. 1515, Ilorin, Nigeria

Phone: +2348035065190, +2348036910988

The Society hereby calls for applications for appointment as Fellows of the Society from suitably qualified and distinguished members who are in good standing financially and scientifically.

For the 2025 exercise, the following criteria shall be taken into consideration:

- a. attainment of status of a professor;
- b. contributions to NISEB;
- c. Ph.D. supervision;
- d. contributions to Science/ Experimental Biology/Area of Specialisation;
- e. active participation at NISEB local Chapter and in previously held NISEB conferences;
- f. evidence of international research; and
- g. financial standing in NISEB.

The College of Fellows will screen all applications.

A nomination form is attached which must be duly completed and endorsed accordingly. Completed forms should be submitted to: nisebpresident@gmail.com, on or before **12 NOON of MONDAY, 3rd March, 2025**.

Prof. B. V. Owoyele, FNISEB, FNSN, FTPS

Signed

President
