

**FROM THE
EDITOR**

**ILLUMINATING INSIGHTS AND
COLLABORATIVE ENDEAVOURS**

Dear Esteemed Readers,

In the vibrant tapestry of scientific exploration and collaboration, it is with great pleasure that I welcome you to the latest edition of the NISEB Bulletin. As the custodian of knowledge dissemination within our community, the Bulletin stands as a testament

to the collective efforts and shared enthusiasm for the biological and allied sciences.

In this edition, we embark on a celestial journey with a special focus on lunar exploration. The moon, our ever-present cosmic companion, has captivated the imagination of scientists and enthusiasts alike. Through insightful articles and updates, we unravel the stories of lunar visits, exploring the achievements and discoveries that have shaped our understanding of the cosmos.

At NISEB, we take pride in fostering interdisciplinary connections and get prepared as this August is our annual conference at the Federal

University of Technology Akure (FUTA). This edition explores the fascinating intersection of experimental biology, chemistry and lunar exploration. We also feature what is happening in our chapters as reported by the effervescent coordinators. Our Bulletin wouldn't be complete without celebrating the achievements and collaborations within the NISEB community. From research spotlights to community-driven initiatives, this edition reflects the dynamic spirit of our members who continually push the boundaries of biological sciences.

I extend my gratitude to the contributors whose dedication has shaped the content of this Bulletin. To our readers, I invite you to explore the diverse and enriching articles within these pages. Your engagement and contributions play a pivotal role in sustaining the vibrant tapestry of our scientific community.

Happy reading!

Sincerely,

Dr David Olugbenga Adetiton,
Editor, NISEB Bulletin/Newsletter

FROM THE PRESIDENT

I am
delighted
to
welcome
you to read
the first
edition of

our bulletin for the year 2024.

This is against backdrop of our preparations for 23rd Annual Conference and General meeting which has been scheduled for the Federal University of Technology Akure, Akure, Ondo State. The Local Organizing Committee is headed by Prof. A. C. Akinmoladun.

On a general note, we have recently witness a spike in the interest of many scientists willing to take up membership of the society. They have not been from university or within country alone but from different institutions and outside the country. This trend is impressive. We therefore, encourage you to promote

the society wherever you and among your circle of influence. We encourage our local chapters to be more active and send quarterly report to Editor of our Bulletin who is also the National secretary of the society.

Finally, we all need to fulfill our financial obligations to the society by paying up our membership dues. The financial year now runs from January to December of every year and soon the Treasurer will display a list of current financial members.

I wish you all the very best in your research, teaching and innovation.

Prof. Bamidele Victor Owoyele, FNISEB, FNSN, FTSP
nisebpresident@gmail.com
nisebpresident@gmail.com

LUNAR LANDINGS: A HISTORICAL ODYSSEY AND LESSONS FOR EXPERIMENTAL BIOLOGISTS

Exploring the Moon has been a monumental achievement in human history, with several countries successfully landing spacecraft on its surface. Let's take a journey through these historic lunar missions and uncover the intriguing lessons experimental biologists can draw from these extraordinary endeavors.

1- Soviet Union (Luna Program):

Luna 2:

When: September 12, 1959.

How: Luna 2 was the first human-made object to reach the Moon, marking a significant milestone in space exploration.

2- United States (NASA):

Apollo Program:

When: July 20, 1969.

How: The United States achieved the first manned Moon landing with the Apollo 11 mission. Neil

Armstrong and Buzz Aldrin made history by stepping onto the lunar surface.

3- China (CNSA):

Chang'e Program:

When: December 14, 2013 (Chang'e-3).

How: China's Chang'e-3 mission successfully landed a rover named Yutu on the Moon, showcasing advanced lunar exploration capabilities.

4- India (NASA):

Chandrayaan-3 Program:

When: August 23, 2023.

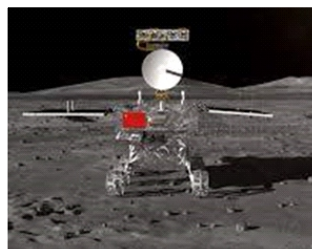

How: India's Chandrayaan-3 successfully touched down on the moon (lunar surface) on August 23, 2023. The successful landing wasn't assured, considering the uncertainties associated with previous lunar missions. In 2019, a previous Indian vehicle faced a crash while trying to reach the moon, a fate shared by spacecraft from Russia and a Japanese company earlier 2023.

*Soviet Union Luna landing
(Popular Mechanics, 2020)*

*United States Luna landing
(Express, 2021)*

*China Luna landing
(Spacenews, 2018)*

*India Luna landing plumps PM Modi's
global standing (Asiatimes, 2023)*

Experimental Biology Lessons: Now, how can experimental biologists draw inspiration from these lunar missions?

Innovation and Collaboration:

Lesson: Lunar missions required groundbreaking innovations and collaboration across scientific disciplines. Experimental biologists can benefit from interdisciplinary collaborations to drive innovation in their research.

Perseverance and Tenacity:

Lesson: Overcoming challenges is inherent in lunar exploration. Experimental biologists should embrace a similar tenacity, pushing the boundaries of knowledge despite obstacles.

Global Cooperation:

Lesson: Moon landings were achieved through international collaboration. Experimental biologists

can amplify their impact by fostering global cooperation in scientific research.

Technological Advancements:

Lesson: Advancements in technology were critical for lunar missions. Experimental biologists should stay at the forefront of technological innovations to enhance the precision and scope of their experiments.

Conclusion: The conquest of the Moon serves as a testament to human ingenuity, determination, and international collaboration. Experimental biologists can harness these lessons to propel their field forward, pushing the boundaries of scientific understanding and contributing to the collective pursuit of knowledge.

THE PIONEERING ROLE OF EXPERIMENTAL BIOLOGY IN SPACE EXPLORATION"

Experimental biology plays a crucial role in unraveling the mysteries of space and understanding the impact of extraterrestrial environments on living organisms. This article explores the multifaceted contributions of experimental biology to space exploration.

1. Microgravity Studies:

Experimental biologists conduct studies to comprehend how microgravity affects biological processes. This research is vital for long-duration space missions and potential colonization efforts.

2. Muscle Atrophy and Bone Density:

Studies in space help unravel the mechanisms behind muscle atrophy and bone density loss, guiding the development of countermeasures to mitigate these effects on astronauts.

3. Radiation Exposure Experiments:

Experimental biology investigates the impact of space radiation on living organisms. This research informs the development of protective measures for astronauts during extended space missions.

4. Cellular and Genetic Responses:

Understanding cellular and genetic responses to cosmic radiation is essential for anticipating health risks and devising strategies to minimize the impact on astronauts' well-being.

5. Bioregenerative Life Support:

Experimental biologists contribute to the development of bioregenerative life support systems that use plants and microorganisms to recycle air and water. This sustainable approach is crucial for prolonged space missions.

6. Closed Ecological Systems:

Research in experimental biology explores closed ecological systems that mimic Earth's ecosystems, providing insights into creating self-sustaining habitats for future space exploration.

7. Biomedical Research for Astronaut Health:

Experimental studies delve into how the human body adapts to the unique challenges of space travel, such as fluid shift, altered circadian rhythms, and cardiovascular changes.

8. Psychosocial Impact:

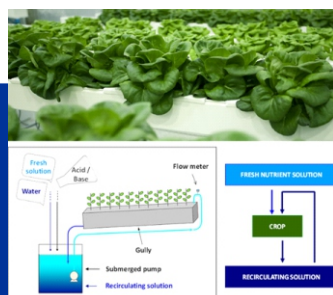

Behavioural and psychological experiments help understand the psychosocial impact of isolation and confinement during space missions, contributing to strategies for maintaining mental well-being.

9. Astrobiology and Exobiology:

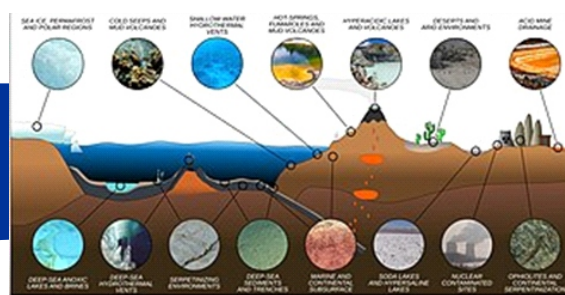

Experimental biology plays a pivotal role in astrobiology, exploring the potential for life beyond Earth. Experiments aim to understand the conditions necessary for life to exist elsewhere in the cosmos.

10. Adaptation to Extreme Environments:

By studying extremophiles on Earth, experimental biologists provide insights into how life could adapt to extreme environments on other celestial bodies.

*Closed Ecological System
(Life Sciences in Space Research, 2015)*

*Diversity of extreme environments
on earth (Merino et al., 2019)*

Conclusion: Experimental biology serves as a cornerstone in advancing our understanding of the challenges and opportunities presented by space exploration. The insights gained from these experiments not only benefit astronauts on their cosmic journeys but also contribute to our broader understanding of life's resilience and adaptability. The collaboration between biology and space exploration continues to push the boundaries of scientific discovery, fostering a new era of exploration and discovery beyond our home planet.

SOJOURN OF AN ERUDITE SCHOLAR AND MENTOR

It was at the Nurudeen Alao Auditorium Hall, Distant Learning Institute, University of Lagos, that Professor Joy Elizabeth Okpuzor bowed out of active service after a meritorious thirty-three years of service. The event took place on Wednesday, 28th February, 2024. Prof Okpuzor was President of our Society for Experimental Biology of Nigerian (NISEB) from 2012 to 2015. During her tenure, the society experience tremendous growth and development. She is currently a member of the Board of Trustee (BOT) of the society.

Prof Okpuzor : Celebrated

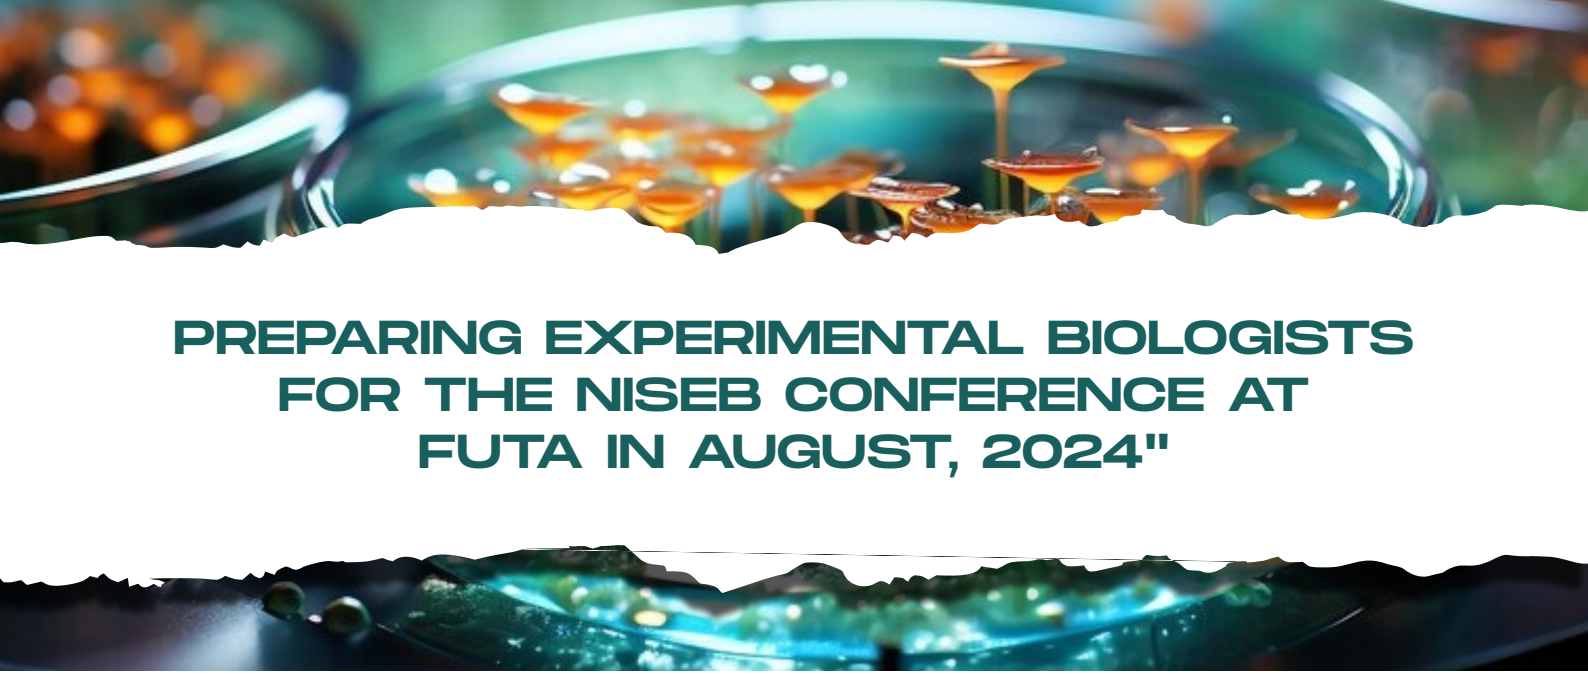

The Unilag gathering was to celebrate Prof Okpuzor, an Academic giant who is a product of three great Universities namely; University of Ibadan for her first degree in Biochemistry, University of Benin for Master's degree in Biochemistry and University of Lagos for her PhD degree.

During her stay in the University of Lagos, she demonstrated extraordinary leadership skill as Head of department and Head to several University committees. She has trained many PhD students as direct supervisor and co-supervisor who have gone to become great scientists, CEOs, lecturers and captains of industries. She has also supervised over 80 Masters students and 180 undergraduates. She has published over 60 academic publications both Internationally and nationally. Prof Okpuzor has examined at least 7 Ph.D theses internationally and nationally and eight has been assessed for Professorial appointments by her.

As an erudite scholar who has contributed to advancement of academics and research, she collaborated with counterparts both home and abroad. She is a winner of several academic grants such as the Global Seeding Labs' 2017 instrumental Access program and other grants close to 140 million Naira equipment in cash and equipment. She extended her research to the areas such as Nanotechnology and synthetic biology approach to improve transcriptional and translational efficiencies of proteins for biotechnology and biomedical applications. Her latest publication in Bioengineering on designing genetics circuits that would induce the expression of RNase including CRISPR/Cas systems to degrade the viral RNA is expected to be customizable template that could be tested against Lassa, SARS-CoV-2 and influenza viruses which as endemic in Nigeria.

She has also carried out national and international assignments as Chairman or member of panels for universities accreditation. She is also active in many international and national learned societies in where has served in several capacities. She is the past President, Lagos Chapter of Organisation for Women in Science for the Developing World (OWSD) 2017-2021.

In celebration of this great colossus and academic giant, the Mentees of Prof Okpuzor, department of Cell Biology and Genetics, Faculty of Science, University of Lagos, family members, friends and professional colleagues came together for her retirement reflection. The occasion was graced by The Vice-Chancellor of the University of Lagos and all her management team, Professor Maurice Iwu a foremost scientist and former Chairman of National Independent Electoral Commission (INEC) as the Keynote Speaker, Eng. Olu Onakoya as Chairman and Special Guest of Honour. Professor Clement Bewaji, one of the founding fathers of the Nigerian Society for Experimental Biology and one of the Trustees of the Society also served as the plenary speaker.

PREPARING EXPERIMENTAL BIOLOGISTS FOR THE NISEB CONFERENCE AT FUTA IN AUGUST, 2024"

The Society for Experimental Biology of Nigeria (NISEB) conference at the Federal University of Technology, Akure (FUTA) in AUGUST, 2024 promises to be a gathering of great minds, expertise, and cutting-edge research in the field of experimental biology. As experimental biologists gear up for this prestigious event, careful preparation is key to ensuring a successful and impactful participation. Scientists and researchers from within and outside Nigeria are welcome.

Abstract Submission and Presentation:

Experimental biologists must focus on creating concise yet comprehensive abstracts that highlight the significance, methodology, and outcomes of their research. Clear communication is essential for attracting attention.

Polishing Presentation Skills:

Preparing for oral or poster presentations involves refining communication skills. Practice sessions help researchers convey their findings effectively and engage with the audience during Q&A sessions.

Stay Updated on Emerging Trends:

Ahead of the conference, experimental biologists should conduct thorough literature reviews to stay abreast of the latest advancements in their specific subfields. This knowledge ensures they contribute meaningfully to discussions and debates.

Networking Opportunities:

Actively participating in pre-conference forums, webinars, and social media discussions related to the conference theme allows researchers to connect with peers and gain insights into emerging trends.

Identifying Potential Collaborators:

The conference provides a fertile ground for forming collaborations. Experimental biologists should identify researchers with complementary expertise to explore potential partnerships for future projects.

Networking Events:

Utilizing networking events and social gatherings during the conference allows researchers to forge connections with professionals from academia and industry. These connections may lead to collaborative research ventures.

Preparing Engaging Visuals:

For those presenting posters, the design and content should be visually appealing and convey the essence of the research. Well-designed posters attract attention and facilitate meaningful discussions.

Interactive Visuals for Presentations:

Those delivering oral presentations should prepare visually engaging slides. Incorporating graphs, images, and animations enhances the audience's understanding and makes the presentation more memorable.

Q&A Anticipation and Rehearsals:

Experimental biologists should anticipate potential questions related to their research and rehearse responses. Being well-prepared for the Q&A session demonstrates a thorough understanding of the work.

Peer Review:

Engaging in mock peer-review sessions with colleagues helps researchers identify potential gaps in their presentations and refine their responses to challenging questions.

Conclusion: The NISEB conference at FUTA in August, 2024 is a platform for experimental biologists to showcase their research, exchange ideas, and contribute to the advancement of the field. By meticulously preparing abstracts, staying updated on trends, fostering collaborations, creating engaging visuals, and rehearsing for Q&A sessions, experimental biologists can maximize the impact of their participation and make meaningful contributions to the scientific community. The conference represents an opportunity not only to present findings but also to foster a collaborative and vibrant community of researchers dedicated to pushing the boundaries of experimental biology.

DRS OYEDEJI AND ADETITUN PRESENT PAPERS AT ACBBBF 2024: INTERNATIONAL CONFERENCE AT UKA TARSADIA UNIVERSITY, BARDOLI, GUJARAT, INDIA

The Tarsadia Institute of Chemical Science, Uka Tarsadia University in Bardoli, India, successfully hosted the "Advancement in Chemical & Biological Research: Breaking Boundaries and Shaping the Future (ACBBBF 2024)" International Conference from February 8 to 10, 2024. This prestigious event was organized in collaboration with the Tarsadia Institute of Chemical Science and the Association of Chemistry Teachers (ACT) Mumbai.

The conference centered on the theme "Advancement in Chemical & Biological Research: Breaking Boundaries and Shaping the Future," emphasizing the evolving landscape of research in these domains. The conference witnessed active participation, with more than 500 attendees, including esteemed scientists, researchers, academicians, and students from across the globe.

Distinguished scholars, including Dr. Stephen Oyediji (NISEB-ILORIN) and Dr. Olugbenga Adetitun (NISEB GENERAL SECRETARY), were among the approximately 20 plenary speakers who shared their insights, expertise, and groundbreaking research. Engaging sessions, both oral and poster presentations, provided a comprehensive platform for participants to share their research findings, exchange ideas, and foster collaborations.

A highlight of the conference was the recognition of excellence in poster presentations, with 10 outstanding presenters receiving accolades for their innovative contributions. Five oral presenters were also honored for their exceptional presentations, showcasing the diversity and depth of research topics discussed during the conference.

Participants were treated to a delightful culinary experience, with breakfast, lunch, and dinner served at the conference venue. The culinary offerings reflected the rich and diverse culture of the region. The conference provided a conducive environment for networking, fostering potential collaborations between participants from various research backgrounds.

The ACBBBF 2024 International Conference at Uka Tarsadia University was a resounding success, bringing together leading minds in chemical and biological research. The event not only celebrated current advancements but also paved the way for future breakthroughs, embodying the spirit of breaking boundaries and shaping the future in the realms of scientific exploration.

As we reflect on the impactful presentations, engaging discussions, and recognition of outstanding contributions, the conference serves as a beacon of inspiration for the global scientific community, propelling us towards new frontiers in chemical and biological research.

NISEB ON Social Media

NISEB is now on Twitter, Facebook and LinkedIn.

Members are enjoined to follow the society on its Social Media angles and post good content therein.

The Board of Trustees (BOT) and the National Executive Council (NEC) of NISEB wish to introduce to all members and new applicants, the new website of the Society for Experimental Biology of Nigeria, NISEB.

The link to the new NISEB website home page is: nisebnigeria.org

We are all encouraged to click on this link and move around the website, to see all the features made available to our members and other scientists.

FOR OLD/CURRENT NISEB MEMBERS

Old members (fellows, full members, and students) that have paid their annual dues (fellows N 20,000, full members N 10,000, corporate bodies N 50,000, students N5,000; foreign membership (full members) \$ 50, foreign membership (postgraduate students) \$ 20, foreign membership (undergraduates) \$ 10) for 2024 can now view and print their certificates yearly.

Old NISEB members who are yet to pay for this year can now pay their annual dues, depending on their status, into NISEB NEC account

SOCIETY FOR EXPERIMENTAL BIOLOGY OF NIGERIA

**United Bank for Africa (UBA) NEC
Account Number: 2213930226.**

After payment, Teller or Bank transfer transactions should be sent to the Treasurer, via 08037802662 WhatsApp Dr. Omowumi Kayode. The payment will be validated immediately after the *Treasurer receives their evidence of payment. They too will Immediately be able to view and print their membership certificates from their page. It will also be automatically sent to the email address supplied

by the member.

FOR NEW MEMBERS, ANNUAL PAYMENT

From the home page, nisebnigeria.org

Applicants will click on *join us today* to get payment information and fill in their data as requested and *submit* online. The applicant will immediately receive an email to pay the amount stated above to the *NISEB BOT account.

SOCIETY FOR EXPERIMENTAL BIOLOGY OF NIGERIA

**United Bank for Africa (UBA) BOT
Account : 2199353266**

After payment, the Applicant will send his evidence of payment to Prof M.T. Yakubu, 08037544437, or Dr. Kayode, 08037802662. They will receive an alert to validate the applicant.

As soon as they *validate the applicant*, the new member's, certificate and new membership number will automatically be sent to his email address to print from his end as coloured or as black and white. Visit the website now and mobilize other experimental biologists around you to join and participate in NISEB activities. nisebnigeria.org. Interested international scientists are encouraged to apply.

In addition, every old member can log in to their portals on the website with the email on the NISEB database and their membership numbers. On logging in you can edit some of your information on the portal and if you have any challenge please *contact the PRO Dr. Faoziyat Sulaiman (08032127200).

After the validation of membership, new members will also be able to log in to their portals.
Thank you.

UPDATE FROM NISEB CHAPTER AT DELTA STATE UNIVERSITY OF SCIENCE AND TECHNOLOGY (DSUST) OZORO

NISEB DSUST chapter was inaugurated on the 21st of July 2022 by Prof A. Taiga on assumption as a staff of Delta State University of Science and Technology (DSUST) Ozoro. He inaugurated eighteen members, which cut across Faculty of Science and Faculty of Agriculture; which included selected executive of the chapter. Through the intervention of the chapter's patron; Prof. A. Taiga, the Vice Chancellor of Delta State University of Science and Technology Prof J.S. Oboreh approved sponsorship of fourteen (14) members whose abstracts were accepted for the 21st Society for Experimental Biology of Nigeria (NISEB) 2022 Annual Scientific Conference at Mountain Top University; and mandated him to bring the hosting right of the 2023 NISEB Conference, but we lost the hosting right to Babcock University.

NISEB is gaining momentum in DSUST; very soon we shall commence local seminar where members will discuss their research findings because most members are still active PhD students working in various laboratories. Two of our members Mr. Oshilim A.O. of the department of Science and Laboratory Technology and Mr. Obruche M.A. of the department of Environmental Management and Toxicology resigned their appointments in 2023. We wish

Meeting of NISEB members at DSUST

them well in their future endeavors. Members because of the harsh economic conditions faced by members poorly attended the 22nd NISEB Annual Conference at Babcock University (BU), Ilishan-Remo, Ogun State.. However, our Chapters Patron physically attended at BU, while. Nine (9) members from our chapter who sent in abstracts participated virtually. In addition, we will commence scientific quiz competitions and debates among our undergraduate students soon. We are optimistic that we will be at the upcoming scientific conference at Federal University of Technology (FUTA) Akure.

Appointments

- Prof A. Taiga (Chapter patron), appointed Chairman, Academic Textbook/Manual Review Committee, 5th February 2024 in Delta State University of Science and Technology Ozoro.
- Dr Mrs. P.E. Omoruwou (Chapter Secretary General), appointed Acting HOD of Marine Science on the 13th December 2023 in Delta State University of Science and Technology Ozoro.
- Mrs. Okinedo J.I (Chapter Treasurer), appointed Acting HOD, Science Laboratory Technology, 13th December 2023 in Delta State University of Science and Technology Ozoro.

Retirement

Mr. Gambari U.O.B. of the Department of Plant Science and Biotechnology bowed out of active service, 22nd October 2023 after reaching the compulsory retirement age of sixty-five (65) years.

Membership

The introduction of new academic programs in DSUST recently has tremendously increased membership in the chapter. The excos have reached out to the newly employed staff in the various departments and they have registered. The names of the newly registered staff are Mrs. Asibeluo E. H., Mr. Eyaguobor, E. E., Mr. Obi C.C., Mrs. Aruoren O., Miss Ainyanbhor I., Mr. Okom S., Mr. Ohwokevwo A. O., Dr. Eze E. M., Dr. Enenya R. P., Mr. Obiebi P. O., Mr. Anozie J. A., Miss. Michael I. D., Mr. Akogu S. I. and Mr. Oriomah C.

Our old members are Mr. Akpobire, D., Mrs Emenewa, C., Mr. Gambari, U. O. B., Mr. Okobia, U. B., Mrs Aphiar, A. E., Mrs. Ukolobi, O., Miss Isoje. E. F., Mrs. Orubu, M., Mr. Daoudu, B. T., Miss Umukoro, P., Mr. Unuafe, S. and Mr. Aregbor, O. Our Chapter executives are Mr. Orogu, J. O. (Coordinator) and Dr. Mrs. P. E. Omoruwou (Secretary). Other excos are Mr. Liebig O. Jegbefume, Mrs. Okinedo, J. I., Mr. Jessa, O. and Prof A. Taiga (chapter patron).
Thank you.

Mr. Orogu Joshua O.

DSUST, NISEB Chapter Coordinator

NISEB BAYELSA MEDICAL UNIVERSITY (BMU) CHAPTER UPDATE

Since the commencement of the Society for Experimental Biology of Nigeria (NISEB), BMU Chapter, we have made notable progress. We have had series of meetings both online and on-site. Our first inaugural meeting held on Monday, 15th January, 2024; was to introduce NISEB to intending members and briefed them what the body is all about. Our next meeting was held on Monday, February 12th 2024; to appoint the official exco members of the body which resulted in the following appointments as State executives: Alpha, Henry Ebiowei (Cordinator), Ezem, Sebhaziba (Assistant Cordinator), Ajumobi, Victor (State Secretary), Ann Ototo Tugwell (Assistant Secretary), Koroye, Christiana (Treasurer), Olagoke, Blessing (Financial Secretary), Perelatei Biriabebe Sogoi (Public Relation Officer) and Ebipadei Ezon Ebi (Ex-Officio). All of these exco members have been active and fully committed to expanding the BMU chapter of NISEB.

Currently, we are pushing our members to be fully registered while also encouraging new members to join us. We have introduced the NISEB BMU Chapter to the Department of Biology and Microbiology and we are on the move to make it known to other departments/faculties in Bayelsa Medical University whose members might be interested in joining us. The Administration of Bayelsa Medical University unofficially is aware of our presence and the excos have scheduled a meet with the Registrar on Monday 25th March, 2024; to officially inform the School of the chapter. After the meet with the Registrar, the excos would meet and discuss the future of the BMU Chapter of NISEB.

We are fully committed in making progress.

Up BMU! Up NISEB! Up Nigeria!

Alpha, Henry Ebiowei

NISEB, BMU Chapter Coordinator

THE FEDERAL UNIVERSITY OF TECHNOLOGY, AKURE
ANNOUNCES
SOCIETY FOR EXPERIMENTAL BIOLOGY OF NIGERIA (NISEB)
23rd ANNUAL SCIENTIFIC CONFERENCE AND GENERAL MEETING
Akure 2024 **DATE: 12 – 15 AUGUST, 2024**

THEME Emerging Technologies in Experimental Biology: Catalysts for Food Security, Well-being and Sustainable Development

CALL FOR ABSTRACTS
(PLEASE SEE THE ABSTRACT SUBMISSION GUIDELINES OVERLEAF)

SUB-THEMES

- ✓ Experimental biology, food security and sustainable agriculture
- ✓ Experimental biology, phytomedicine and medicinal chemistry
- ✓ Experimental biology, good health and wellbeing
- ✓ Omics technology, big data analytics and experimental biology
- ✓ Artificial intelligence, machine learning and experimental biology
- ✓ Experimental biology and climate change
- ✓ Experimental biology and biodiversity conservation
- ✓ Bioinformatics and computational biology
- ✓ Nanotechnology and experimental biology
- ✓ Environmental and experimental biology

REGISTRATION FEES

Early Bird (Till May 31, 2024)
Members: N25,000
Non-members: N30,000
PG Students: N10,000
UG Students: N5,000

Regular (1 June – 12 August, 2024)
Members: N30,000
Non-members: N35,000
PG Students: N10,000
UG Students: N5,000
Corporate registration: N50,000
Workshop registration: N5,000

IMPORTANT DATES

31ST MAY, 2024	30TH JUNE, 2024	19TH JULY, 2024	12TH AUGUST, 2024	13TH AUGUST, 2024
Early bird abstract submission deadline	Regular abstract submission deadline	Acceptance notification	Arrival & registration Preconference workshop	Opening ceremony

Virtual participation available

Special feature

Pre-conference training workshop on
1. Molecular Biology (in partnership with Inqaba Biotech, West Africa)
2. Bioinformatics

For more information please contact: 08034445893, 08069256694, 08033944653; niseb2024@gmail.com, aoademosun@futa.edu.ng, acakinmoladun@futa.edu.ng

Abstract submission instructions and guidelines

- ✓ All abstract submissions must not be more than 250 words
- ✓ Authors should indicate which subtheme their presentation belongs to
- ✓ Abstracts should have a concise title in uppercase
- ✓ This should be followed by authors' names, affiliations (department and institution), e-mail address and phone number
- ✓ The corresponding author's address should be indicated with an asterisk
- ✓ Abstracts should be written in English language while Latin words should be in italics
- ✓ Abstracts should be submitted in a Microsoft Word document with the following formatting: double line spacing, font size 12, using Times New Roman
- ✓ Include a maximum of five keywords

Abstracts should be submitted electronically as e-mail attachments to niseb2024@gmail.com and acakinmoladun@futa.edu.ng. The deadline for abstract submission is midnight on June 15, 2024.

Each submitted abstract should be accompanied by evidence of payment of an abstract processing fee of N2500 only.

All conference fees, annual dues, endowment, exhibition, advert, and other fees should be paid into:
Bank name: United Bank for Africa (UBA)
Account name: NISEB FUTA CHAPTER
Account number: 2330400037

Distinguished NISEB members, The website for IJBHS, International Journal of Biomedical and Health Sciences is now fully functional The link is <https://ijbhs.org>

Kindly remember to regularly patronise the journal and the other four journals of the society for maximum visibility of your research works

Thank you all in advance of your patronage

Contact the Chief Editor:
International Journal of Biomedical and Health Sciences.
